Potato Growers of Michigan Membership Information

Did you know there are between 300 and 400 individual pieces of legislation introduced each session that could have a substantial impact on you and your operation at the state level alone.

That means that every *two to three days*, a new piece of legislation is proposed that could affect the way you do business. PGMI works to ensure that legislators are using sound science and information to make educated decisions regarding transportation, and environmental issues including irrigation and water rights. You are a critical piece of a collective voice that advocates solely for Michigan potato growers. The need has never been greater for your support of the PGMI and PGMI PAC.

Please fill out your 2019 Crop Year information to calculate your dues by multiplying your total acres harvested in 2019 by \$1.50.

2020 Dues	# of Acres	Total Dues (acres x \$1.50)
\$1.50/acre harvested in 2019		

Fifty-five percent (55%) of PGMI dues are deemed a lobbying expense, and, therefore, not tax-deductible by the member.

Farm: _____
